

Starting with Scrum@school

Personalised teamwork leads to in-depth learning

Benefits

Scrum ensures more speed, agility, production, and fun in businesses worldwide. Scrum@school directly leads to ownership and motivation in education. Students work better together, learn deeper and develop as team members. 21st Century Skills are addressed naturally.

Introduction

Active orientation on Scrum@school: what is it and what are the benefits (including energetic game). Good foundation to make an informed decision about the added value for your school. Creates support for training. Also suitable as a workshop on study days.

Basic training

Benefits

As a teacher, you learn to introduce and provide guidance for Scrum@school so that your students get motivated to start working in a self-organising manner.

Set-up

After an intensive and practical two-day training course, you are prepared to let your students start with Scrum@school. During the return day, you exchange experiences and deepen your Scrum expertise. Followed by intervision within school and some maintenance sessions on demand. Including teacher's manual, student's guide, Scrum materials and digital helpdesk.

Scrum@school as a method is useful in subjects and projects in which cooperation has added value (secondary education to university). **Scrum@school** trains and guides teachers who want to use Scrum in their classrooms.
