Scrum@school
Summer School

An inspiring three-day course that will permanently change your way of teaching. How do you think school life would be with students taking responsibility, working together in a self-organising way, delivering on time and continuing to improve their results? How do you like the idea of students starting on their own, encouraging and addressing each other and growing as a teamplayer? Discover all the secrets of Agile education with Scrum in this international Summer Course.

Every Sprint a bit better
Scrum@school scaffolds teamwork and the learning process.
The Scrum board gives structure and insight for students and teachers. Sprint Releases make end results achievable and prevent postponement. Scrum gives the team responsibility and autonomy for the HOW, that makes students grow. Iterations and feedback loops (feedback, Review, Retro) stimulate a Kaizen (growth) mindset and progression in working and learning. Students can and will improve again and again. Therefore: every Sprint a bit better.

Audience
An international group of 16-20 teachers who are eager to transform their education with Scrum@school (secondary -, vocational -, higher education) and are interested in starting Scrum@school in their own country.
